

CORE HANDLING

Shear Clamp for Separating inner tubes.

Alignment Clamp to prevent mechanical damage during separation of inner tubes

Hydraulic Core Shear for consolidated formations when IT stabilizers are used

PROTECTING YOUR DATA

Proper Core handling is imperative to core quality. With the right tools and techniques for every job, Foothills' enhanced core recovery techniques and equipment will preserve the integrity of the sample from the well to the lab

STANDARD HANDLING TOOLS

TRAINING

All Foothills' personnel are trained in core handling techniques derived straight from core labs in order to provide the best protection for your data.
